

We are committed to supply high quality products and services, which includes special steels, welding consumables, heat treatment, and steel machining services.

Our customers are the centre of our attention, and our employees are the key to our success. We have created an environment that promotes teamwork and all our employees are regularly coached and trained to maintain an up-standard customer service.

We strive to reduce occupational incidents, minimise risk, manage environmental impacts and enable excellence in operations and business performance while providing a workplace that takes into account the safety and wellbeing of employees, visitors and contractors.

For us to achieve this we will:

- Ensure that we comply with the requirements of Quality Management System ISO 9001:2015.
- Ensure that identified objectives and targets are managed to ensure the effectiveness and efficiency of the Quality Management System.
- Manage our processes in a responsible manner to ensure the quality of our Products and Services.
- Regularly monitor the level of our customer satisfaction, and ensure continual improvement of the Quality Management System
- Periodically review our, Safety Health Environment Quality objectives and communicate the targets.
- Adhere to all defined statutory regulations related to Safety Health Environment.
- Identifying hazards, assess risks and implement effective controls to prevent causes and mitigate possible consequences
- Learning from incidents to prevent future re-occurrence.
- Regularly conduct, Safety Health Environment Quality awareness to remind our people of our standard operating procedures.
- Review the Health, Safety and Environmental policy periodically, and make it available to all employees and customers of our organization.
